

## Contract Details

1. **Full Name of the Contracting Body:**

Fife Council

2. **Name and ID of the Contract:**

Air Quality Management Provision EF0084

3. **Services Required:**

The contract is divided into three lots, each requiring specific services related to air quality management and associated services within Fife, Scotland.

- **Lot 1: Servicing/Calibration of Automatic Monitoring Equipment**

- Routine maintenance and servicing of four automatic continuous "real-time" monitors.
- Provision of a 48-hour call-out response service.
- Supply of calibration gas and management of data for monitoring stations.

- **Lot 2: Data Management and Reporting of AQMesh Units**

- Management and processing of data from eight AQMesh units.
- Provision of statistical analysis and reporting.

- **Lot 3: General Air Quality Reporting**

- Production of Annual Progress Reports (APRs).
- Investigation and reporting on specific local air quality issues.
- Review of planning application Air Quality Impact Assessments.
- Support for Clean Air Day events and public consultations.

4. **Financial Constraints:**

The estimated expenditure is approximately £97,000 per year, contingent on grant funding from external organizations like the Scottish Government.

5. **Vendor Requirements:**

- Capability to ensure the Council retains best practice status in air quality management.
- Experience with air quality monitoring, reporting, and modelling.
- Ability to provide temporary replacement equipment if necessary.
- Knowledge of relevant technical guidance including DEFRA Technical Guidance LAQM.TG (22).
- Ability to liaise with various Council departments and external parties.
- Required insurance includes Employer's Liability (£10M), Public Liability (£5M), and Professional Negligence (£1M).

6. **Other Considerations:**

- **Contract Period:** January 1, 2025, to December 31, 2027, with an option to extend up to 12 months.

- **Awarding:** Each lot will be awarded to a single supplier. Tenderers can bid for one, two, or all lots.

- **Evaluation Criteria:** Environmental considerations and community benefits are part of the evaluation criteria. The contract will be awarded based on the Most

Economically Advantageous Tender (MEAT) with a 50/50 price/quality ratio.

- **Geographical Restrictions:** Services are to be provided within Fife, Scotland, with specific locations mentioned including Cupar, Dunfermline, Kirkcaldy, and Rosyth.

This summary provides a concise overview of the requirements and conditions for the Fife Council Air Quality Management Provision contract, aiding in the decision-making process for potential vendors.

## Best matches

Based on the requirements of the Fife Council Air Quality Management Provision contract EF0084, the following companies could potentially fulfill the contract's needs:

1. **Air Protection**
  - Specializes in air quality monitoring and control.
  - Offers services including air quality testing, analysis, and air filtration systems.
  - Relevant for Lot 1 and Lot 3 of the contract.
2. **Spot Sensor Technologies**
  - Developed AirSpot, an air quality sensor device.
  - Expertise in air quality monitoring could benefit data management and reporting for AQMesh units.
  - Relevant for Lot 2 of the contract.
3. **ERT (Scotland)**
  - A leading environmental consulting company based in Scotland.
  - Specializes in survey, monitoring, consulting, and reporting.
  - Experience in environmental impact assessments and air quality monitoring.
  - Suitable for all three lots of the contract due to comprehensive environmental services.
4. **Zephyrus Aerolabs**
  - A company dedicated to reducing greenhouse gas emissions and promoting clean energy sources. Based in Aberdeen City, Scotland, Zephyrus Aerolabs' focus on environmental sustainability could complement the air quality management and monitoring aspects of the contract.
5. **Ciendos**
  - Specializes in emissions data, analytics, and risk assessment tools, aiming to support the global effort to achieve Net Zero emissions. Their expertise in emissions data collection and analysis could be particularly relevant for data management and reporting requirements of the contract.

6. **FQM**

- A Glasgow-based company specializing in QHSE compliance software solutions. FQM's experience in providing software and consultancy services for managing quality, health, safety, and environmental processes could be beneficial across all lots of the contract, especially in ensuring compliance and managing air quality data.

These companies are identified as the best matches based on their expertise in air quality management and monitoring, which aligns with the specific services required by the contract. Their capabilities and experience in similar projects make them strong candidates for consideration.
