

Contract Details

1. **Contracting Body:** Aberdeenshire Council
2. **Contract Name and ID:** Integrated Asset Management System RFI, APR502183
3. **Services Required:**
 - **Comprehensive Asset Tracking:** Ability to track a diverse range of assets including roads, public buildings, bridges, streetlights, parks, trees, bus stops, shelters, and waste properties.
 - **Lifecycle Management:** Management of assets from acquisition through disposal, including maintenance and replacement planning.
 - **System Integration:** Seamless integration with existing finance, Geographic Information Systems (GIS), Customer Relationship Management (CRM), and other relevant systems.
 - **Work Order Management:** Efficient creation, assignment, tracking, and completion of work orders.
 - **Inventory Management:** Tracking and management of materials, equipment, and other inventory items.
 - **Document Management:** Secure storage, access, and retrieval of documents related to asset management.
 - **Task Assignment and Scheduling:** Allocation of tasks to appropriate personnel with scheduling capabilities.
 - **Reporting and Analytics:** Generation of reports and insights for decision-making and performance tracking.
 - **Audit Trail and Compliance Tracking:** Recording of actions for audit purposes and ensuring compliance with relevant standards and regulations.
 - **Mobile Access:** Mobile application or web access for field personnel to access and update system data remotely.
 - **Budgeting and Financial Management:** Tools for managing the financial aspects of asset management, including budgeting and cost tracking.
 - **Customer Service Request Handling:** Management of customer inquiries and requests related to council assets.
 - **Training and Knowledge Management:** Provision of training materials and knowledge resources for system users.
 - **User-friendly Interface:** An intuitive interface that minimizes training requirements and enhances user adoption.
 - **Role-based Access Control:** Customizable access permissions based on user roles within the organization.
 - **Security and Data Privacy Protections:** Ensuring the security of data and compliance with data protection regulations.
4. **Financial Constraints:** No specific budget information provided.
5. **Vendor Requirements:**
 - **Cyber Essentials Certification:** Mandatory for all vendors, with Cyber Essentials

Plus required for high-risk services.

- **Compliance with Aberdeenshire Council's Security Compliance**

Standard: Vendors must adhere to detailed security standards set by the council.

6. **Other Considerations:**

- **Cloud-based Solution:** The system should be cloud-based and hosted.

- **Integration with Power BI:** Desirable for enhanced analytics and reporting capabilities.

- **CRM Functionality:** Desirable to have integrated customer relationship management features.

- **Geographical Restrictions:** Services to be performed specifically in Aberdeenshire, Scotland (NUTS code: UKM50).

- **Stage of Procurement:** This is a Request for Information (RFI) only, intended to gather market information for future procurement specifications.

- **Response Deadline:** Vendors are required to submit their responses by April 30, 2024.

This summary outlines the Aberdeenshire Council's requirements for an integrated asset management system to efficiently manage a wide range of public assets and services. Vendors interested in participating must meet specific security certifications and comply with detailed security standards, among other qualifications.
